

Project report

Introduction

Over view

Empathy map (deforestation),(brainstorming (deforestation), and book cover using canva (deforestation).

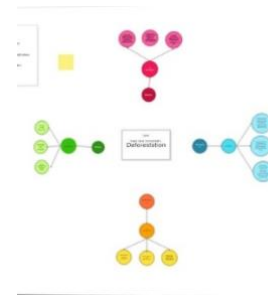

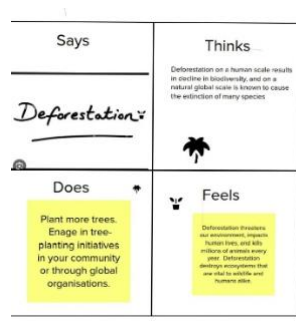

Purpose

To protect our life from nature disasters. So don't distrube nature it causes big problem for our future.

Problem definition and design thinking:

Empathy map (deforestation).

Brainstorming (deforestation)

Resul

Design a book cover with canva.(deforestation)

Advantages and disadvantage:

This design are used for awareness to nature disasters and our future life that is the advantage of my design.

Some body aware my design or ignore my design and that matter was said many people but no one take about that matter that is my design disadvantage

Application

My team design only use for awareness from deforestation and don't waste papers and maximum avoid some woods products. Forest is very important to our future. We can't live without forest. Product forest it's our responsibility and product forest is very must our next generation. Trees and forest are god's gift.

Conclusion

I learn many things about this naan mudhalvan project. I learn how to use to edit in mural app and canva app that scheme is very useful to all. We are learn many things from it thank you! For this scheme by our CM M.K. Stalin.
